EXPERIENCE

Jane Street :: Software Engineering Intern

OCaml Quantitative Jan 2022 – Apr 2022 New York, New York

Tesla :: Software Engineering Intern (Firmware Tooling)

Haskell Firmware C May 2021 – Aug 2021 Remote

- Continued development work on Haskell firmware tooling code base
- Implemented network scheduler for custom Cybertruck communications protocols in Haskell using novel functional techniques
- Designed and implemented C API code generation tools for embedded real-time vehicle transmissions in the Cybertruck

TQ Tezos :: Software Engineering Intern (Blockchain)

Blockchain Haskell Sep 2020 – Dec 2020 New York, New York

- Authored Tezos smart contracts in a Haskell EDSL to automate proprietary applications for permissioned blockchains
- Converted fragmented Python-based Tezos Kubernetes deployment script to idiomatic Dhall, greatly improving readability and maintainability
- Constructed peer-to-peer staking topology monitoring and visualization infrastructure with Python

Tesla :: Software Engineering Intern (Firmware Tooling)

Haskell Python Java Jan 2020 – Aug 2020 Palo Alto, California

- Developed and maintained large Haskell code base responsible for automated firmware documentation, code, and signal generation
- Improved Haskell products' performance and runtimes by over 20% by identifying laziness-related space leaks and rewriting hot code paths
- Responsible for design and implementation of firmware verification infrastructure employed by entire organization

Ericsson :: Software Engineering Intern (Performance)

Clojure Python May 2019 – Aug 2019 Kanata, Ontario

- Developed pure functional Clojure metrics infrastructure to monitor complex JVM architectures, allowing for discovery of multiple performance issues
- Implemented a parser and interpreter for an internally designed performance-testing DSL

CENX :: Software Engineering Intern (Test Automation)

Python Systems Jul 2017 – Sep 2017 Ottawa, Ontario

- Created custom implementation of IETF RFC socket protocols to debug non-standard network stacks
- Discovered and provided patches for multiple security issues, including cryptography weaknesses, via automated fuzzing

inBay Technologies :: Software Engineering Intern (Full Stack)

Ruby Rails Javascript Jul 2016 – Aug 2016 Kanata, Ontario

PROJECTS

s-zeng/dhall-python

Rust Python Dhall

Python bindings for Dhall, a functional configuration language

s-zeng/board-to-latex

Flask OCR Latex

Turn pictures of math into \LaTeX

s-zeng/rag-shenanigans

Python Torch MIDI

Generate ragtime music with AI

OPEN SOURCE

eraserhd/parinfer-rust

Rust Vim

835541e Add support for Dune

nvim-lua/telescope.nvim

Lua Vim Script

59ef37d Implement shortcut to dynamically use other telescopes

kyazdani42/nvim-tree.lua

Lua Vim Script

9aa8be6 Fix crash from glibc bug

MISC EXPERIENCE

 **Teaching Assistant**
Number theory and algebra

 **Camp Counsellor**
For youth robotics camps

 **Accordion Teacher**
Offering private lessons

EDUCATION

Bachelor's degree, Computer Science

2022 University of Waterloo
